Hi, Rachel.

It was a pleasure meeting you as well. In terms of sharing your data with others, I think the Colorado Data Sharing Network might be what you are looking for. The Web site is <http://www.coloradowaterdata.org/>.

When it comes to EPA using the data, you might try contacting Dan Wall. He is a toxicologist here at EPA. He could give you more information about the quality assurance criteria that have to be met for EPA to use sampling data. You can contact him at 303-312-6560.

Subject: Question

Cynthia,

It was really nice to meet and talk with you a bit at the ARSG meeting last week.

I do have a question for you regarding data sharing. The Animas Watershed Partnership is going to be doing sampling on the Florida and Salt Creek just south of Durango. We wondered if the EPA would use this data or share it? We are only interested in getting the public involved and aware of the water quality. Any thought?
